

Opulent yet organic, sensuous yet sustainable. The natural beauty and order of a honeycomb was my inspiration.

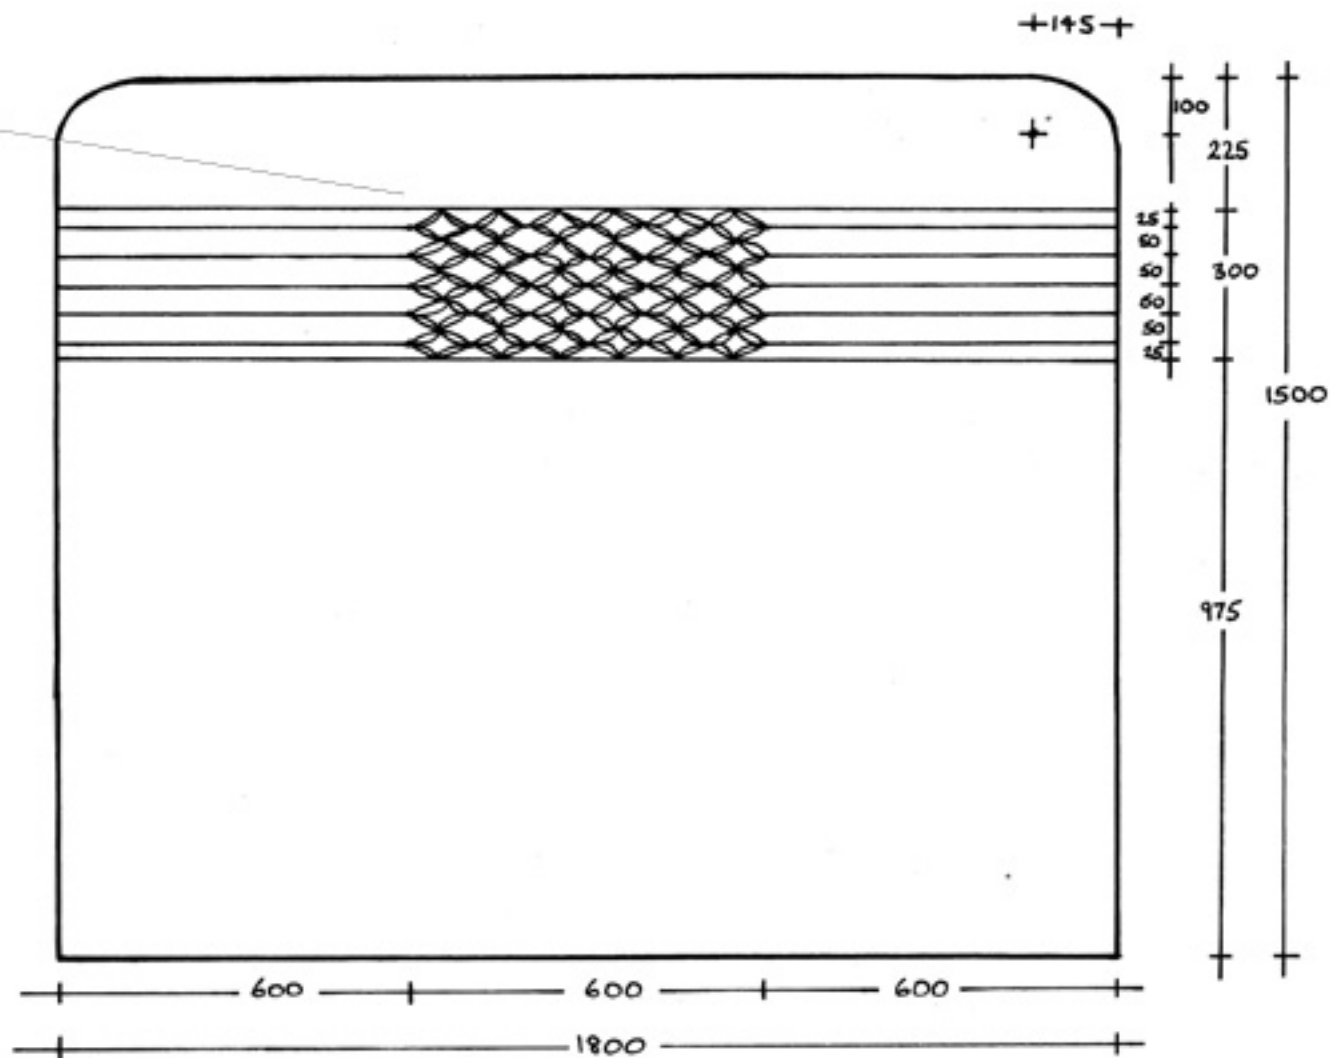

SAVOIR BEDS

“Organic” Inspiration board

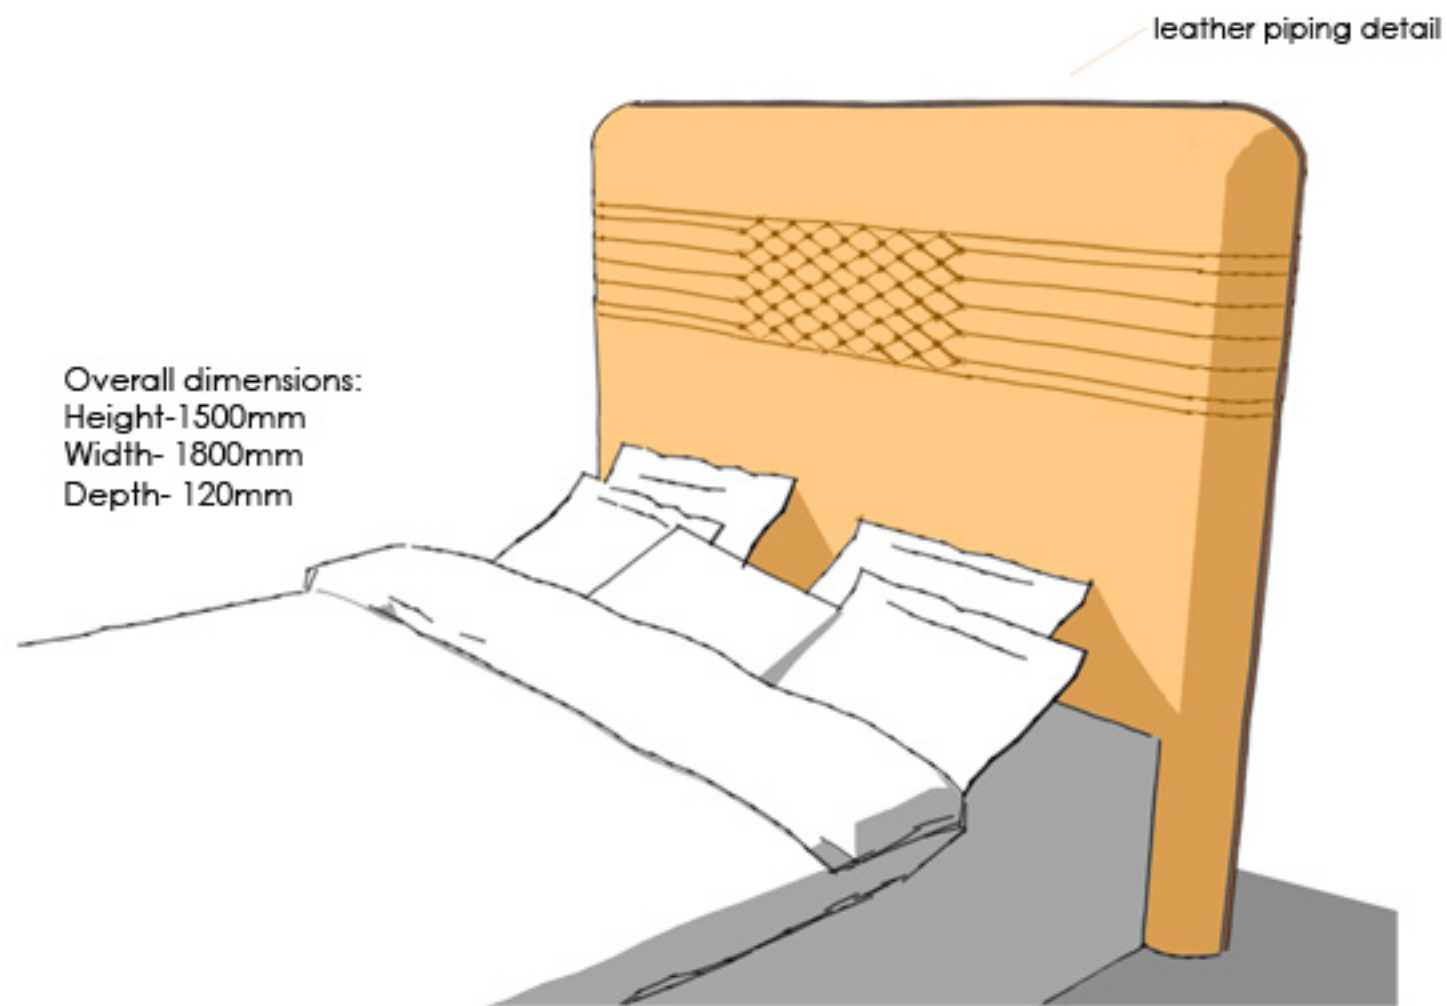

The full width smocking detail is a panel that is pre-made and applied to the backing fabric with a neat top stitch. The smocking is held together by a self-coloured, small stitch at the junction of each peak.

The headboard itself is soft-padded and has rounded edges on the top and sides with a 10mm diameter piped edge in 'conker' coloured leather.

Depth of headboard= 120mm

The smocking detail and stitching, inspired by honeycomb, creates a smart, tailored feel. The fabric, although organic has a lustrous sheen to it, to create a sense of luxury.

## Headboard Materials:

### **100% virgin Eco wool satin in Pumpkin**

Rainier by Oecotextiles

Produced by an eco conscious producer.

No synthetic inputs are used on the livestock- no dips, pesticides or routine antibiotic treatments are used.

Scouring of the wool is done using only hot water and biodegradable detergents.

The fibre is treated within an ethical and environmentally aware workplace.

Why wool?

- Wool improves air quality by absorbing and retaining VOCs.
- Wool breathes and helps regulate humidity.
- Wool is a rapidly renewable, sustainable resource.
- At the end of life, wool biodegrades- and none of the chemicals used in producing this fabric can hurt you or your ecosystem.

### **Organic leather 1.2mm thick in Conker sourced from natureally.co.uk**

British rare breed cattle skins are used under the strictest rules of British Organic certification with the advantages of smaller herds.

Ethically sourced and produced, chrome-free and environmentally friendly.
