Lavender Scented Headboard

Headboard Overview

A nature inspired luxury headboard constructed using organic materials, with an organic shape and feel, gently scented to promote wellbeing and aid restful sleep.

Rationale

There is some scientific evidence to suggest that aromatherapy with lavender may slow the activity of the nervous system, promote relaxation and improve sleep quality and there is no better feeling than waking from a restorative nights sleep. Organic does not mean that a product cannot be luxurious. The combination of organic form, gentle fragrance and soft touch velvet together in a lovingly crafted headboard on a Savior Beds custom built bed will bring a touch of luxury to any master bedroom or guest suite.

Materials

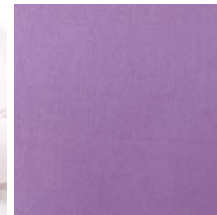

Headboard structure	natural wood
Headboard filling	brushed cotton fibre & dried lavender
